

Borderless dentist is an very international organization that I have met volunteers from different countries. We speak different language but we share the same values, Love and Care the people around us. The founder of Borderless dentist, Dr.Taka, is an excellent dentist with good heart who is willing to devote his previous time and effort to help the minority. I appreciated his selflessness and generosity deeply.

The activities were very diverse and meaningful, from teaching the Kids how to brush the teeth to providing extraction and restoration treatment, monitoring the teeth conditions . The kids and teacher from all refugee schools were super friendly that we enjoyed a lot and shared the happiness together.

The kids were so adorable and surprisingly cooperative! I love every kids! How could they brush so happily? They kept smiling to me when I was teaching toothbrushing! The teachers were super helpful for the translation and arrangement. It was happy to see that the teachers put emphasis on the oral health education!

Borderless dentist service trip at Mae Sot Rina Chan

I was very grateful to join Dr.Taka's team since everything was well organized, Dr. Taka prepared all the equipment we needed, the transportation, and brought us to enjoy local food. I felt so warm that we volunteered like family, really thank you so much Dr.Taka for organizing everything. The team was really professional as we had photographers, assistants and translators, we shared laughter all the time!

The volunteer activities of Borderless dentistry were very impressive and memorable. If you want to serve the society, meet new friends, gain more clinical exposure, learn from experienced clinicians , enjoy the happiness, I recommend you to join! This will definitely to give you an new insight and experience!
